Beschreibung

The Ferretti 681 was developed as an evolution of the successful 680 model, reinterpreting its lines with a more modern, dynamic, and brighter design. This model stands out for its more aggressive and elegant profile, introducing stylistic features that later became a true hallmark of the shipyard, such as the large “open-view” windows in the master cabin.

The 2006 unit offered combines the prestige of the Ferretti shipyard with meticulous and consistent maintenance. Located in the Northern Adriatic and flying the Italian flag, she is presented in excellent technical and cosmetic condition. Ready at the buoy, with VAT paid and RINA certification valid until 2029, she represents a rare opportunity for those seeking an iconic yacht, maintained without compromise and ready for the next season.

Exterior Areas

The Ferretti 681 offers generous and well-organized outdoor spaces designed to fully enjoy life at sea in total comfort. The spacious sunbathing areas, complete with well-maintained cushions, provide ideal relaxation spaces both forward and on the flybridge.

The cockpit, functional and well protected, is perfect for outdoor dining and social moments. The yacht is equipped with biminis and full navigation electronics, duplicated on the flybridge, including radar, autopilot, GPS, and echo sounder.

Particularly appreciated is the presence of a third control station in the cockpit, which greatly facilitates docking maneuvers, making them easier and safer.

Interior Layout and Equipment

The interiors reflect the refined and timeless style of the shipyard, with bright spaces and quality finishes. The layout includes 4 guest cabins:

Full-beam master cabin with large open-view windows

VIP cabin forward

Twin cabin with single beds

Twin cabin with bunk beds

A separate crew area with 3 berths ensures privacy and functionality during cruising.

The yacht is fully equipped to ensure maximum onboard comfort: air conditioning throughout, satellite TV, watermaker, and a fully equipped galley including an ice maker. The presence of twin 20 kW Kohler generators guarantees energy autonomy and reliability in all conditions.

Engines and Systems

Propulsion is provided by two MAN V12 engines, each delivering 1,360 HP, with approximately 1,980 engine hours. This configuration allows a top speed of around 33 knots and a comfortable cruising speed of 27 knots, offering both strong performance and reliability.

For easier maneuvering, the yacht is equipped with both bow and stern thrusters, ensuring precise control even in tight marina spaces.

This Ferretti 681 represents an ideal choice for those seeking a highly successful yacht model, combining strong performance, generous spaces, and complete equipment, ready to be enjoyed immediately.

**This boat lies in Italy and as such, its sale is subject to Italian customs and practices on yachts brokerage, which state that the agency commission of 10% is paid in half between the seller and the buyer. The sale price published on this site is therefore calibrated so that the seller pays to the broker only 5% and does not include the other 5%, which must be paid directly by the buyer to the broker.
