Beschreibung

Just arrived at Morgan Marine, this Offshore 105 is a well equipped fishing vessel with a proven history operating as a fishing charter boat in Essex waters. Fully coded, with a Mid-Term Code of Practice completed in early 2026, the vessel has been inspected against the relevant requirements of the Maritime and Coastguard Agency (MCA). Powered by a Volvo Penta TAMD 63P 370hp diesel engine, extensively rebuilt in 2025, this Offshore 105 offers a capable platform for fishing and commercial marine use. Her double layer GRP semi displacement hull provides a robust foundation, while the large cockpit offers plenty of space for fishing activities. This boat is equipped with a range of fishing equipment and onboard electronics, including chart plotters and VHF radios, making her well suited to time on the water. Below deck, the practical interior features a galley with a gas cooker, stove, sink and microwave, alongside a comfortable saloon with seating and a table. The forward cabin provides a double berth, offering accommodation for overnight stays and extended trips. With her spacious cockpit, comprehensive onboard equipment and recently rebuilt engine, this Offshore 105 is well worth considering for anyone looking for a versatile fishing vessel with an established charter background. Contact Morgan Marine today for further information or to arrange a viewing.

Deck:
